PRESS RELEASE

Ottawa, Canada. IoT613 (Ottawa's Internet of Things) Conference 2019 is excited to welcome hundreds of speakers, sponsors and participants for 2 days of action packed learning, networking and sharing - all focused on the Internet of Things from Ottawa, Canada, and beyond.

This years [IoT613 Conference 2019](#) will take place on May 8 & 9, 2019 at the Canadian Museum of History.

Hosted by IoT613, the mandate of IoT613 Conference 2019 is to foster a culture of knowledge, sharing and growth within the local and global IoT community. By bringing together industry visionaries and policy leaders, IoT613 provides a platform for technology and policy professionals to learn, connect and interact with the IoT community at large for the advancement of technology and economic development.

Sponsored by the [Internet Society](#), [Irdeto](#), and [Detour UX](#), and many other best-in-class organizations, IoT613 Conference 2019, will include three full-day workshops including the UX of Artificial Intelligence and Machine Learning with New York based global UX leader Josh Clark of [Big Medium](#). The conference's Expert Speaker Series will provide an unparalleled opportunity to hear from thought leaders on Cybersecurity, Precision Agriculture, IoT in Canada, Human Interplay with Technology, and a local 613 Showcase. The conference will connect the organizations and people who are connecting people, places and things.

"We are very excited for this year's line-up of speakers, sponsors, and topics. The themes of the conference cover a wide range of this broad term we call, The Internet of Things" said IoT613 co-founder and CEO, Adam Freed.

This eclectic mix of topics and speakers include:

1. IoT Development Workshop - A hands-on full-day development workshop that will teach the basics of Reverse Engineering through Capture the Flag challenges.
2. The Business of IoT - Includes several interactive workshops focused on taking an IoT idea to market, applying Design Thinking to human-centered IoT business solutions and key legal concerns to considerations to grow your company..
3. UX for Machine Learning and Artificial Intelligence - This full day workshop will be hosted by global UX leader Josh Clark of Big Medium from New York City.

4. Networks for IoT - Will share how 5G is changing the IoT game, best practices to build IoT-ready network connectivity solutions and key trends to consider when developing IoT capabilities.
5. Cybersecurity & Assurance of the IoT - This session will go inside the mind of a hacker, explore the new norms and standards afoot in the IoT ecosystem and share why IoT trustworthiness is a journey.
6. Status of IoT in Canada - This dynamic panel session, made up of industry, government and academic experts will explore this and other questions including: What are the IoT trends? What sectors and regions are embracing IoT, and what are the benefits for businesses and citizens?
7. Precision Agriculture - Learn how IoT supports farming of the future and why it is already the cornerstone of precision agriculture innovation.
8. You & Me in the Age of IoT - Discover how the IoT can be leveraged to change human behaviour and how IoT with Blockchain can create societal and economic benefits.
9. 613 Showcase - This is the place for the local IoT community to gather while highlighting the IoT innovations, applications, and initiatives in the National Capital Region.
10. Networking Social and Whiskey Tasting with the [Ireland Canada Chamber of Commerce Ottawa](#).

IoT613 Conference 2019 will be the biggest and best yet – a must attend event for industry professionals, executives, policy makers and researchers alike!

IoT613 is looking forward to connecting with the Canadian and International technology and business community. Tickets are available on the iot613.ca website.
